Check Data Integrity
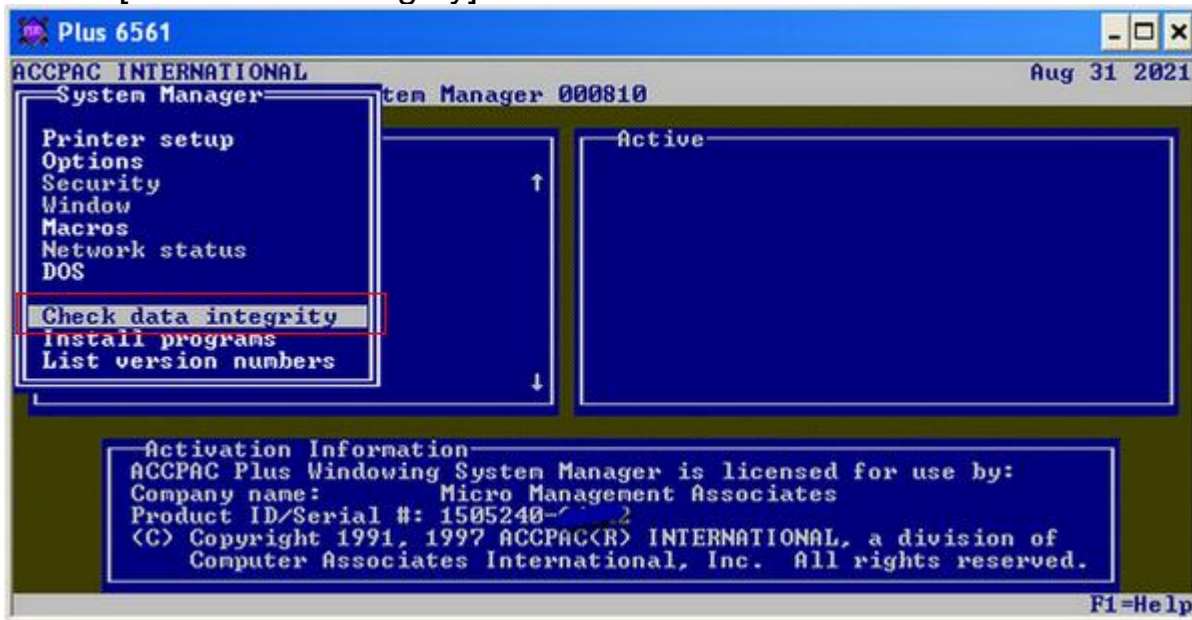

ACCPAC Plus data integrity should be checked regularly to be sure the accounting data has not been corrupted. We recommend doing this twice a week.

At ACCPAC Plus Windowing System Manager, press F3
Select [Check Data Integrity]

Select [One start list item]

· Select the start list item that you wish to check from the list

MICRO
MANAGEMENT

```
Check integrity
Phase 2 check of:    SAMDATA AP

   Checking data

   Stage:
   Vendor:
   Record:
   Errors:
   Errors fixed:

           ┌──────────────────────────────────────────────┐
           │ Do you want to fix all errors that can be fixed? │
           │                                              │
           │                 Yes    No                    │
           └──────────────────────────────────────────────┘
```

Select [No]

```
┌──────────────────────────────────────────────────┐
│ Integrity check complete.  Data contains no errors. │
│                    Continue                        │
└──────────────────────────────────────────────────┘
```

There should be no data integrity errors found. If there are errors, please contact Micro Management Associates at (212) 477-0040
